

# ETRACS ETN Product List

ETRACS Exchange Traded Notes (ETNs) are senior, unsecured, unsubordinated debt securities that are designed to track the total return of a specific market index, less investor fees, and provide investors with exposure to the total returns of various market indices, including indices linked to stocks, bonds and commodities.

After their initial offering, ETRACS ETNs can be bought and sold through a broker or financial advisor on a US securities exchange.
