\*\* "Current Yield (annualized)" equals the current quarterly Coupon Amount, multiplied by four (to annualize such coupon), divided by the closing Current Indicative Value of the ETN on its current Coupon Valuation Date rounded to two decimal places for ease of analysis. The Current Yield is not indicative of future coupon payments, if any, on the ETN. You are not guaranteed any coupon or distribution amount under the ETN.

\*\*\* "Current Yield (annualized)" equals the current monthly Coupon Amount and the two immediately preceding monthly Coupon Amounts, multiplied by four (to annualize such coupons), divided by the closing Current Indicative Value of the ETN on its current Coupon Valuation Date rounded to two decimal places for ease of analysis. The Current Yield is not indicative of future coupon payments, if any, on the ETN. You are not guaranteed any coupon or distribution amount under the ETN.

Note: HDLB, SMHB and PFFL pay a variable monthly coupon linked to 2 times the cash distributions, if any, on the respective underlying index constituents, less withholding taxes, if any. CEFD and MVRL pay a variable monthly coupon, and MLPR and BDCX pay a variable quarterly coupon, each linked to 1.5 times the cash distributions, if any, on the respective underlying index constituents, less withholding taxes, if any. Variations in the amount of monthly or quarterly distributions will lead to large variations in the Current Yield as calculated above. As such, the Current Yield for each is not indicative of future coupon payments, if any, on these ETNs.
